Applicant

THYSSENKRUPP ENCOKE GMBH et al

1. Transmittal of the translation to the applicant.

The International Bureau transmits herewith a copy of the English translation made by the International Bureau of the international preliminary examination report established by the International Preliminary Examining Authority.

2. Transmittal of the copy of the translation to the elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following elected Offices requiring such translation:

AZ, CA, CH, CN, CO, GH, KG, KP, KR, MK, MZ, RU, TM

The following elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only apon their request:

AE, AG, AL, AM, AP, AT, AU, BA, BB, BG, BR, BY, BZ, CR, CU, CZ, DK, DM, DZ, EA, EC, EE, EP, ES, FI, GB, GD, GE, GM, HR, HU, ID, IL, IN, IS, JF, KE, KZ, LC, LK, LR, LS, LT, LU, LV, MA, MD, MG, MN, MW, MX, NO, NZ, OA, OM, PH, PL, PT, RO, SC, SD, SE, SG, SK, SL, TJ, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, YU, ZA, ZM, ZW

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report.

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

BESTSAVAILABLE COPY.

	Industrial applicability (IA)	Claims	1-6	YES
		Claims		NO

2. Citate ::: and explanations

Reference is made to the following document:

D1: US-A-5 628 977 (HEISEL MICHAEL ET AL) 13 May 1997 (1997-05-13)

The present application meets the requirements of PCT Article 33(1) because the subject matter of claims 1 to 6 is novel (PCT Article 33(2)) and involves an inventive step (FCT Article 33(3)).

Document D1 is considered the prior art closest to the subject matter of claim 1. Said document discloses a method for treating H2S-containing exhaust gases in a Claus plant (cf. figure 2 and column 6, lines 35 to 45), the gas being fed into a Claus boiler (12), sulphur and condensation (17) being separated off, the process gas being supplied to a single reaction furnace having a catalyst (23) and a working temperature of between 170 and 220 °C, the process gas leaving the reaction furnace then being cooled (25) and elementary sulphur being separated off by condensation (26). After precipitation of the condensed sulphur, the process gas is supplied to a postcombustion stage, washed (C) and fed back into the Claus boiler (12).

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/EP 03/04899

The subject matter of claim 1 differs from the known method in that the $\rm H_2S$ -containing gas (coke oven gas) that is to be treated in the Claus plant is washed and regenerated <u>first</u>, and in that the process gas leaving the reaction oven is fed back into the gas washing stage upstream of the Claus boiler.

Returning the process gas that leaves the reaction oven with a residue of hydrogen sulphide to the gas washing stage upstream of the Claus boiler ensures that post-combustion of the process gas, as in D1, is not required (step B in figure 1) and means that the Claus plant can be simple in design, because the process gas can contain a residue of unreacted hydrogen sulphide, which is then captured in the gas washing stage.

Claims 2 to 6 are dependent on claim 1 and likewise meet the requirements of PCT Article 33(1).
